Web Development Projects

Pentimento [Live App](#) | [GitHub](#)

A mobile-first web application for finding and uploading street art around New York City. Worked on the functionality and style of various components of the site such as map, edit artwork, view all artworks and more. Developed using Mapbox, React.js, Redux.js, Node.js, Express.js, Sequelize and other technologies. *May 2020*

Daisy's Wine Shop: [Live App](#) | [GitHub](#)

An e-commerce wine store. Implemented the functionality and style of various components of the site such as single product view, add, edit and delete a product, navigation bar, users view and more. Used React.js, Redux.js, Node.js, Express.js, Sequelize and other technologies. *April 2020*

Food Search : [Live App](#) | [GitHub](#)

A restaurant search site. Implemented both back-end and front-end of this food search application querying the yelp API database to display the restaurants based of the type of food or location the user specifies. Used the Yelp API, React.js, Node.js, Express.js and other technologies. *May 2018*

Experience

Grace Hopper at Fullstack Academy | Software Engineer Fellow Jun. 2020– Present

Mentoring and teaching computer science fundamentals, programming concepts, and debugging techniques with to 20+ students. Leading code reviews, technical interviews and debugging sessions.

R/GA | Front-end Software Engineer Intern | Oct. 2018– Feb.2019
